Software Engineer

As a Software Engineer with a bachelor's degree in Computer Science and specialization in C++ programming, I have a strong foundation in computer science principles and experience in a variety of programming languages including C, C++, HTML5, and JavaScript. I have proven skills in project management and leadership, as demonstrated by my experience as a supervisor at Walmart and my successful freelance web development business. I have completed a Full-stack Developer Bootcamp, allowing me to proficiently develop both front-end and back-end applications. In addition, I have expertise in technologies such as Docker, ExpressJS, and MongoDB, and have familiarity with a range of additional technologies including React Native, Python, and AWS. I am dedicated to staying current with the latest developments in the field and am excited to bring my skills and passion to a new team as a Junior Software Engineer.

SKILLS

C, C++, C#, HTML5, TypeScript, React Native, Python, Docker, JavaScript, ExpressJS, CSS3, SQL, MongoDB, Bash, Git, Lua, Next.js, Node.JS, Redux, Java, Firebase, PostgreSQL, Linux, Object Oriented Design, Search Engine Optimization, Test-driven Development, Resource Allocation, Amazon Web Services
